

# FAQ

## FAQ - Fall 2025

### **Common Questions**

**What if I already have in-depth DS/SWE/HWE/PM experience and feel that taking another course is overkill?**

A: Those with significant technical experience may forgo the introductory track (coursework) and begin the recruitment process from the practical track (project-based “assessment”). Once you have completed the practical track and interview, you may join a project team immediately! Details on the recruitment process will be updated on the main page of this course site.

**Can I work on a DAML project while I work through the course?**

A: We ask that all students complete the initial onboarding before working on internal or client projects. This onboarding does equip you with a beginner project, though.

**When can I begin the advanced project interview process?**

A: Applications for the process have not yet been released. We will update you via newsletter and Slack when they do come out.
